

# Coastal Research Services

## ABOUT GCRL

The Gulf Coast Research Laboratory is a public, non-profit research facility dedicated to working toward a future of sustainable marine and coastal resources through scientific discovery, development of new technology, and education of future scientists and citizens.

## AVAILABLE EXPERTISE

Our faculty and staff possess a wealth of expertise in fields that are crucial in a number of coastal and marine applications.

### AREAS OF EXPERTISE

- Coastal Botany
- Wetlands Restoration
- Benthic Ecology
- Fisheries Assessment
- Aquatic Toxicology
- Habitat Assessment
- Coastal Restoration
- Remote Sensing
- Coastal Geology
- Water Quality
- GIS & GPS
- Marine Mycology

## OPPORTUNITIES

Our experts are available for:

- Consulting
- Analysis
- Evaluation
- Monitoring
- Technology Development

Noetic Technologies, Inc. is an initiative of Southern Miss geared toward marketing and commercialization of the University's technology. We are the link to match the needs of private partners with the resources at GCRL.
